3. PP SCALING & REFRESH REWORK (ANTI-NOVA)

The playtest "Full Refresh on Quick Rest" allows for game-breaking bursts. This 2e rework stabilizes output across a standard 4-battle arc.

- **Battle Refresh: You regain half of your maximum Power Points (rounded up) after every quick rest. You only regain your full pool during a Full Heal-up.**
- **Augmentation Cap: You cannot spend more than half your current level (minimum 1) in additional Power Points on a single power. This ensures you have resources for the entire battle.**
- **Standardized Miss Damage: Any power that says "Miss: —" or "Half Damage" now deals Damage equal to your Level.**
    - ***Augmented Miss:* If you spend at least 1 PP to augment a power, the miss damage increases to Level + PP Spent.**

Psionic Disciplines (Sub-Classes)

As a Psion, your power is divided into six disciplines. You only have access to the powers of a discipline if you take at least one of its associated talents.

- **Initiate Rank:** 1 Talent in a discipline.
- **Adept Rank:** 2 Talents in a discipline.
- **Master Rank:** 3+ Talents in a discipline.
- **2e Correction:** Each talent chosen provides a permanent +1 bonus to either **Physical Defense** or **Mental Defense** as noted below.

Psionic Defenses (2e Standard)

- **Base AC:** 10 + Middle mod of (Con/Dex/Wis) + Level.
- **Base PD:** 11 + Middle mod of (Str/Con/Dex) + Level.
- **Base MD:** 11 + Middle mod of (Int/Wis/Cha) + Level.

- **Discipline Bonuses:** * Add **+1 to PD** for each talent you have in: *Energenesis, Somamorphosis,* or *Telekinesis*.
    - Add **+1 to MD** for each talent you have in: *Clairsentience, Metacreation,* or *Telepathy*.

Power Points & Manifesting (2e Resource Rework)

You manifest psionic powers at-will, but augmenting them consumes **Power Points (PP)**.

- **2e Refresh Rule (Half-Refresh):** You regain **half of your maximum PP pool** (rounded up) after each Quick Rest. You only regain your **full PP pool** during a Full Heal-up.
- **2e Augmentation Cap (Anti-Nova):** To maintain the 2e math curve, the maximum amount of PP you can spend to augment a single manifestation is **half your level, rounded up** (Level 1-2: 1 PP cap; Level 3-4: 2 PP cap; Level 5-6: 3 PP cap; etc.).
- **2e Global Miss Damage:** If a psionic attack power misses, it deals **Damage equal to your Level**. If you spent PP to augment the attack, the miss damage is **Level + PP Spent**.

Augmenting Powers

- You pay the base cost (usually 0 for at-wills) to get the base effect.
- You can apply multiple augments to a single power, provided the total cost does not exceed your **Augmentation Cap**.
- You can decide to use an augment *after* you know if the attack hit or missed (unless the augment specifically modifies the attack roll itself).

Hit Point Threshold (2e Standardized)

Many psionic powers are "threshold" powers. They have increased effects if the target's current HP is at or below the following values:

- **1st Level:** 40 HP
- **2nd Level:** 50 HP
- **3rd Level:** 70 HP
- **4th Level:** 80 HP
- **5th Level:** 100 HP

- **6th Level:** 130 HP
- **7th Level:** 160 HP
- **8th Level:** 200 HP
- **9th Level:** 270 HP
- **10th Level:** 320 HP

Psionic Summoning (2e Simplified)

- **Control:** On your turn, you must spend a **Quick Action** to command a summoned creature. If you do, it takes a Standard, Move, and Quick action. If you do not command it, it takes no actions.
- **Stats:** Summoned creatures use your Level for their math and benefit from the **Escalation Die**.
- **Healing:** You can spend one of **your own recoveries** to heal a summoned creature.
- **Dismissal:** Dismissing a creature is a Quick Action.

Implements (Crystals)

- Crystals function as 2e implements (+1 to +3 attack/damage).
- **2e Correction:** The crystal's bonus also applies to the **Attack and Damage** of any **Astral Constructs** you manifest.
- If a power creates a psychic weapon, the crystal's bonus applies to that weapon's attacks.

PSION CLASS FEATS (2E AUDIT)
